

SPRAY EX 2000

VEHICLE INTERIOR CLEANER

Product properties:	Excellent vehicle cleanser for the whole care interior, e.g. upholstery, carpets, plastic parts, roof liner, side panels etc. SPRAYEX 2000 is also excellently suitable for the removal of oily and greasy dirt residues. It is gentle to material and can be removed without leaving any marks.
Application instructions:	For the manual interior cleaning of vehicles. Spray the product onto the surface to be treated or apply it by using a cloth or sponge. After a short reaction time, after-treat the cleaned parts with clear water. Stubborn residues can be treated with a brush. Remaining dirt particles can be removed with a cloth or sponge. Thoroughly vacuum the cleaned parts finally.
Notice:	Please observe the cleaning recommendations by the manufacturer.
Dilution:	1:20 - 1:30 pre-dilution with water Depending on degree of contamination dilute an application-concentration of 1-3% (100 – 300 ml to 10 litres of cold, clear water).
Ph-value in concentrate:	10.5
Frost susceptibility:	no
Material contents:	phosphate, anionic and non-ionic surfactants
Available container sizes:	5 kg (11240) 10 kg (11244) Other container sizes are available upon request.
