

Nano Engine Super Protection

Product details: The highly effective Nano anti-friction protective film seals all the internal surfaces of engines and equipment e.g. oil system, power steering system, automatic and manual gearboxes, differentials, transfer boxes, as well as ensuring that seals, shaft seals and "o" rings remain supple.

Highly effective wear protection • improved oil flow during cold start • smoother and quieter engine running • increased performance • extended life of equipment • excellent "run dry" properties

Applications: For use in all petrol and diesel engines with common rail as well pump injector fuel systems, recommended for use with turbos, catalytic converters and particle filters

Directions for use: Add to the lubrication system. Sufficient to treat 5 ltrs. of oil. Use in power steering systems, gearboxes and differentials at a ratio of 1:10. Before treatment, the cleaning of the oil and lubrication system with powermaxx Oil System Cleaner is recommended.

Frost susceptibility: no

Available in sizes:

300 ml	can
5 l	container
10l	container
20l	container
200l	barrel

This High-Tech Formula contains no solids in suspension, such as, Teflon (PTFE), graphite or MoS2.
